

# YOUNG'S LANDSCAPE MANAGEMENT

## *Creating a Masterpiece in Your Backyard*

**FOR OVER 20 YEARS, YOUNG'S LANDSCAPE MANAGEMENT** has created outdoor masterpieces in yards and properties all over the Delaware Valley. By designing a plan that suits the unique needs of each client, Young's combines traditional landscape services with innovative options like low voltage lighting and outdoor audio products to create a backyard oasis of comfort, beauty, and ease.

According to Joe Ehrenreich, General Manager, "Our best designs include multiple elements, synthetic turf, hardscaping, lighting and of course plantings to bring a client's dreams to fruition. The popularity of outdoor kitchens and fire features has changed the way people use their back yards with more and more activities are moving outside during the spring, summer, and fall seasons."

### **A Maintenance-Free Landscaping Alternative**

One of the most popular products offered by Young's Landscape Management is a synthetic lawn option that gives a fresh-cut appearance year round with *no* maintenance required. Partnered with STI (Synthetic Turf International), Young's offers a full line of synthetic turf products that are safe (for children and pets), durable, and aesthetically pleasing. Imagine the thrill of having a plush, green lawn year round without the agonies of having to mow and maintain it during your precious free time or weekends!

So popular is the synthetic lawn concept that Young's has created a separate division, Y-Turf, that solely designs and installs synthetic turf for putting greens, bocce areas, dog runs, or just a gorgeous lawn to sit back on a lounge chair and enjoy. The company's high quality designers and craftsmen excel in blending synthetic surfaces with natural plantings, patios and walkways, accent lighting and water features for residential and commercial use.

### **A Whole New Meaning to Going GREEN**

In addition to being aesthetically pleasing and maintenance free, going the synthetic lawn route is the "green" thing to do in more ways than one! Traditional lawns require a massive amount of water – approximately 41,000 gallons of water yearly for a lawn. Having the Y-Turf team transform your traditional sod lawn to a synthetic product reduces fertilizer and pesticide use while cutting down on air pollution produced from lawn mowers and other gas-powered equipment. Save the planet and save your dollars too – all in one "green" step!

### **Shore Landscaping Solutions for Shore Properties**

For folks near the shore, synthetic lawn options are a perfect solution – durable and dependable for storms, wind, and salt air. After Hurricane Sandy's wrath, Young's Y-Turf division received

positive feedback from clients who were very pleased to see that their synthetic lawns not only remained intact, but beautiful to look at as well. According to Y-Turf clients Dori and Gene Haley, Jersey Shore, "Y-Turf survived Hurricane Sandy in fine form. The drainage held. No puddles or sinkholes. It's still the nicest 'lawn'."

### **Award-Winning Landscaping Designs**

The Young's Landscape Management team brings hundreds of years of experience in landscaping and related fields, dozens of relevant degrees and certifications, and on-the-job knowledge from having worked with thousands of local homeowners and businesses. Over the years, the team has proudly earned several honors from the Pennsylvania Horticultural Society at the Philadelphia Flower Show, including "Special Achievement: Garden Club Federation of PA-Horticulture" and "Best Achievement: Creating an Inviting Garden Setting." Also in 2012, Young's received an Award of Excellence from the New Jersey Landscape Contractors Association (NJLCA), for the category of Residential Landscape Design/Build (\$50,000-\$100,000) for its Forna Residence project.

### **Ready to Transform Your Yard into a Landscaping Work of Art?**

Visit the Young's Landscape Management website at [www.youngslandscape.com](http://www.youngslandscape.com) or call them at 609-654-5441 to begin the process of transforming your lawn into a Young's masterpiece.
